Background on Class Size Calculations

- New York City Public Schools (NYCPS) reports on class size three times a year for City Council in November, February and June. This June report reflects class size data as of 6/15. In both the November and February reports, class size data is as of 10/31. The November report is aligned with state class size law reporting.
 - NYCPS began reporting June class size data in 2023-24.
- For grades K-5, average class size is calculated by dividing the number of students as of 6/15 by the number of classes as determined by each student's official class from the Automate the Schools (ATS) system.
- For courses in grades 6-12, average class size is calculated by the number of students as of 6/15 in each course from the STARS system as determined by students who are meeting in the same place at the same time.
- Beginning in 2023-24, to align to the methodology used for the class size law, calculations include bridge classes, non-core courses, including arts and physical education, D75 inclusion students, and shared instruction classes. Now, grades 7-8 are only represented in the STARS scheduling data; grade 6 is included in both depending on the school's scheduling method. These changes resulted in higher average class sizes appearing in the data.
 - Additional information can be found in the methodology document posted on the InfoHub: <https://infohub.nyced.org/reports/government-reports/class-size-reports>.

Citywide Class Size Averages

New York City Public Schools (NYCPS) previously reported on class size twice a year with a preliminary report in November and an updated report in February. Results for February reflect refreshed data from 10/31, as the November report includes long-term absences, incomplete scheduling data, and other characteristics that are updated by schools in the February report.

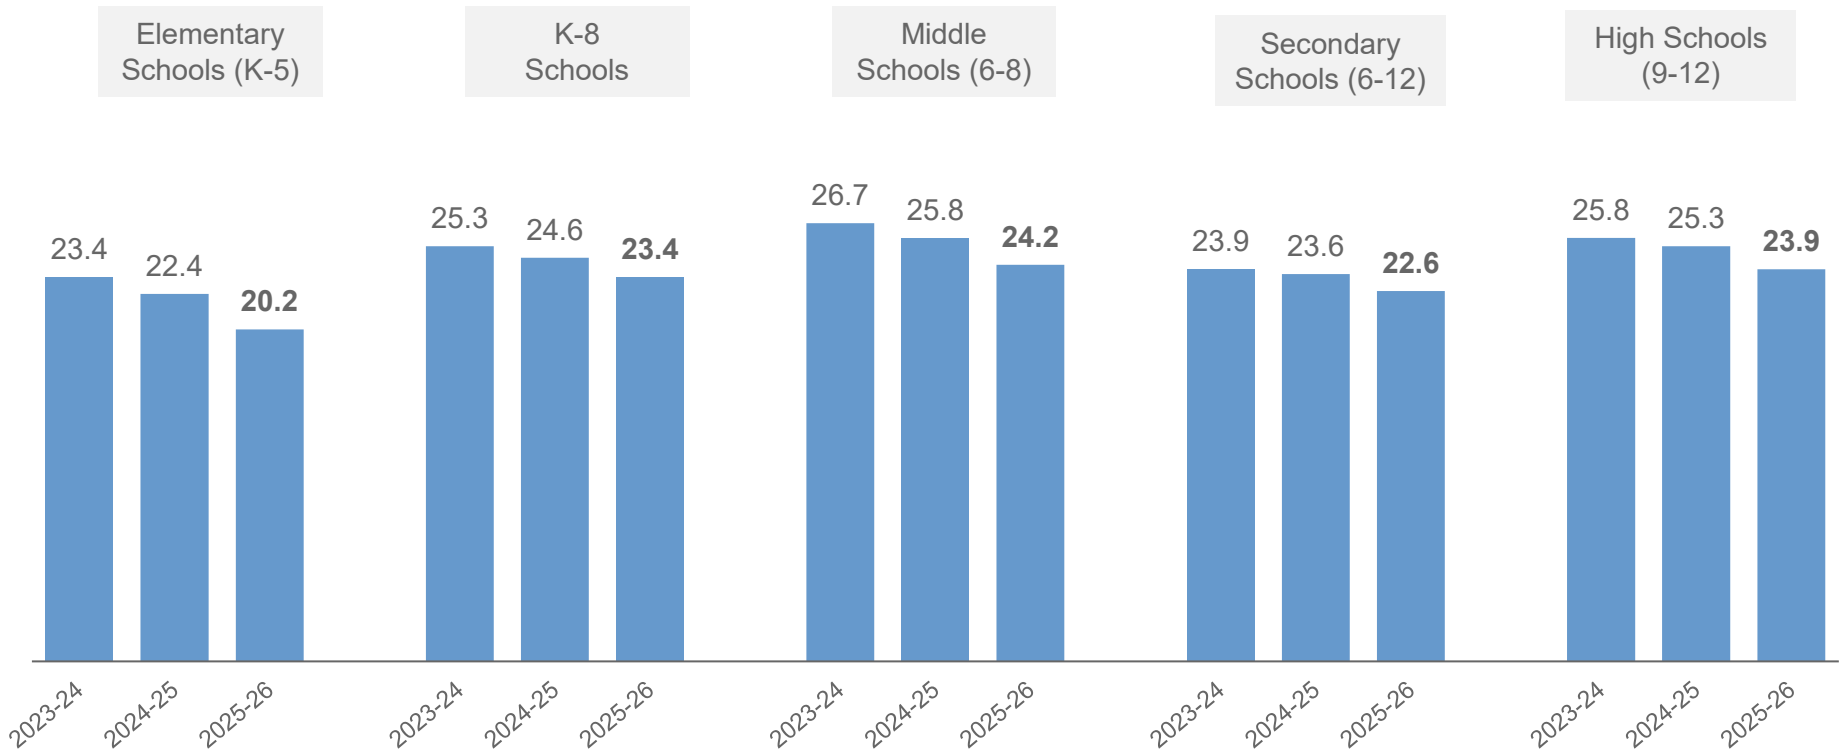

Starting for the 2023-24 school year, NYCPS also reports on class size a third time as of the end of the school year (6/15), reflecting class sizes in the Spring semester.

June average class sizes as of June 15. February average class sizes as of October 31 pulled in February.
